Johnson's Wood Dyes for Aladdin Homes

Johnson's Wood Dye is made in various standard shades. We have adapted the to shades shown below on Oregon Fir, the being the wood furnished by us to all Aladdin homes. These shades are especially adapted to the existing Oregon Fir. Johnson's Wood Dye is a dye in every sense of the word. It penetrates so deeply that the color of the wood is not faded if the wood is exposed to the sun. It keeps out the beauty of the grain, and should not be confused with Vandyke Brown which stains on the surface, giving a glossy, cheap looking effect which does not wear and fade.

The finish of the exterior woodwork in Aladdin homes has been given uniform and graceful attention, and the interior of the best known brands of Wood Dye. Stain and other finishes, we have decided to supply only the JOHNSON'S WOOD DYE with each of our houses, knowing that they are entirely effective and superior to any other wood stain on the market.

JOHNSON'S WOOD DYE does not contain any harsh solvents—the usual fast color products, it contains no pigment subject to the sun's rays, it is made from the finest materials, and is applied with a brush.
