National Friends of the Library week, October 20-26, 2019

Whereas, Friends of the Emmett Public Library raise money that enables our library to keep moving forward, with serves and providing great resources. Meeting funding needs for additional programming, much needed equipment, supporting many aspects of children's summer reading, and special events throughout the year;

Whereas, the work of the Friends highlights on an on-going basis the fact that our library is the cornerstone of the community providing opportunities for all to engage in the joy of life-long learning and connect with the thoughts and ideas of others from ages past to the present;

Whereas, the Friends understand the critical importance of well funded libraries and advocate to ensure that our library gets the resources it needs to provide a wide variety of services to all ages including access to print and electronic materials, along with expert assistance in research, readers' advisory, and children's services;

Whereas, the Friends' gift of their time and commitment to the library and it's patrons, sets an example for all in how volunteerism leads to positive civic engagement and the betterment of our community;

Now, therefore, be it resolved that I, Mayor Gordon W. Petrie, proclaims October 20-26, 2019, as Friends of the Library week in Emmett, Idaho and urges everyone to join the Friends of the Library and thank them for all they do to make our library and community so much better.

Request to Use City Hall Parking Lot – October 26 9 AM to 2 PM

The Emmett Police Department is requesting use of the city hall parking lot on Saturday, October 26 from 9 AM to 2 PM to participate in the DEA's Drug Take Back Day. In the past we have set it up where people can walk into the city hall. This year, we want to offer a drive through setup where people can pull through and drop off their prescription drugs, which will be more user friendly for those who are elderly or disabled.

Ryan Bertalotto, Administrative Sergeant City of Emmett Police Department 501 E. Main Street Emmett ID 83617

PH: 208-365-6055 Fax: 208-365-6062 THIS AGREEMENT is made and entered into by and between **TEKFINITY**, **LLC**, an Idaho Limited Liability company ("Tekfinity") and City of Emmett, ("Customer").

RECITALS

WHEREAS, Tekfinity is in the business of providing Internet Access ("Internet Service"); and

WHEREAS, Customer desires to enter into an agreement whereby Tekfinity will provide to Customer Internet Service.

NOW, THEREFORE, for and in consideration of the mutual promises and covenants herein contained, the parties, for themselves, their successors and assigns, do hereby agree as follows:

- 1. <u>Scope of the Work</u>. Tekfinity shall provide Internet Service and managed firewall or router.
- 2. <u>Contract Price</u>. Customer agrees to pay to Tekfinity the sum of \$0 per month for a period of 12 months, for a total contract price of \$ ("Contract Price").
- 3. <u>Term of Contract; Automatic Extension</u>. The initial term of this contract shall be for a period of month to month
- 4. <u>Charges Not Applicable to Customer.</u> Tekfinity agrees not to charge Customer for setup fees, network traffic monitoring, and/or outage notification.
- 5. <u>Responsibility of Tekfinity</u>. In addition to the responsibilities of Tekfinity as identified herein, Tekfinity shall provide:
 - a. Public IP Addresses;
 - b. Network Address Translation from private to public;
 - c. Monitoring of Customer's network traffic;
 - d. Customer notification of outages:
- 6. <u>Responsibility of Customer</u>. In addition to Customer responsibilities identified herein, the Customer shall provide or be responsible for:
 - a. any equipment or hardware necessary to utilize the Internet Service, as well as any costs, charges or fees associated therewith;
 - b. any equipment and/or labor necessary for the configuration of the equipment and hardware necessary to utilize the Internet Service, as well as any costs, charges or fees associated therewith; and
- 7. Outages. Tekfinity shall not be responsible for any cost and/or expenses incurred by the

Customer as a result of an outage or failure of the Internet Service to be provided by Tekfinity.

- 8. <u>Binding Effect</u>. The provisions of this contract shall be binding upon and inure to the benefit of the heirs, successors, personal representatives, and assigns of the parties hereto.
- 9. <u>Attorney's Fees.</u> If a suit, action or proceeding is instituted to enforce any of the terms of this contract, the prevailing party shall be entitled to recover all costs and attorney's fees from the non-prevailing party.
- 10. <u>Venue</u>. The venue of any action arising out of the execution or breach of this contract shall be in the District Court of Gem County, Idaho.
- 11. <u>Installation Charge</u>. There will be a onetime installation charge of \$0 dollars.

IN WITNESS WHEREOF, the parties have hereunto set their hands the day and year first above written.

BACKGROUND

The City of Emmett Wastewater Treatment Plant (WWTP), located in Emmett, Idaho requires a redundant influent fine screen to protect the WWTP. This upgrade will replace the existing coarse screen with a fine screen.

The format of this Preliminary Engineering Report (PER) is based on the requirements of Idaho Administrative Code, *IDAPA 58.01.16 Wastewater Rules*. This PER provides a description of the proposed WWTP upgrade.

COORDINATION WITH FACILITY PLAN

The Facilities Planning Study (FPS) for the Emmett Wastewater Treatment Plant was approved by the Idaho Department of Environmental Quality (DEQ) in May 2018. This influent screen upgrade was a recommended improvement identified in the FPS (ES.4.3).

LOCATION OF PROJECT

Figure 1 in Appendix A shows the existing treatment facility. The influent screens, identified on the east edge of the WWTP, are contained in the Headworks building.

POPULATION SERVED

The WWTP currently serves approximately 6,689 people and is expected to serve a population of 9,654 by 2040. The WWTP does not treat a significant amount of industrial wastewater; there are no major industrial users connected to the City's collection system.

EXISTING AND ANTICIPATED WASTEWATER FLOWS

At the time the FPS was finalized, the WWTP managed an average annual day flow of approximately 1.89 million gallons per day (mgd) and a peak hour flow of 4.44 mgd. Flow projections for 2040 reflect an average annual flow of 2.73 mgd and peak hour flow of 6.41 mgd. Table 1 under "Design Criteria" summarizes the flowrate projections.

EXISTING AND PROPOSED COLLECTION SYSTEM

This project will not alter or impact the existing collection system.

EXISTING AND PROPOSED TREATMENT WORKS

Wastewater influent flow enters the plant from the east and is collected in the influent lift station. It is then pumped by the lift station to the influent screen. Following the influent screen, the wastewater flows by gravity to the west side of the WWTP site. Next, the wastewater is lifted in the WWTP pump station to a grit chamber, and then divided by a splitter box into one of three aeration basins, where it is treated by activated sludge. Solids generated in the aeration basins are settled out in secondary clarifiers. The clarified water is disinfected, sampled in accordance with NPDES permit, and discharged to the Payette River. Solids generated in the aeration basins are recycled from the secondary clarifiers back to the aeration basins through the return activated sludge/waste activated sludge (RAS/WAS) pump station. Periodically, they are removed from the activated sludge process and sent to the aerobic digesters and then to the lagoons for treatment/storage. The solids are ultimately transported to the landfill for disposal.

The Emmett WWTP accepts septage near its influent lift station. The septage is screened with an automatic coarse screen, and then discharged into the lagoons for treatment and evaporation. If a large amount of

DRAFT PRELIMINARY ENGINEERING REPORT | WWTP INFLUENT SCREEN REPLACEMENT

septage is received, water from the lagoons can enter the WWTP's pump station and be treated in the aeration basins.

This upgrade is to replace the existing coarse screen with an automatic fine screen. This fine screen would still be able to screen the septage; however, with the removable gates already at the WWTP, the fine screen can also provide redundancy for the existing fine screen. Additionally, an air gap system will be added for the screen wash water as part of the upgrade.

EXISTING AND PROPOSED DISPOSAL METHODS

This project will not affect existing disposal methods. Solids removed by the screens will continue to collect in a dumpster and be disposed, as needed, at the landfill.

DRINKING WATER SYSTEM IMPACTS

Domestic wells supply screen wash water. This project will include the installation of an air gap system. This will protect the groundwater source from contamination and allow the WWTP to utilize the well for other, potable uses, if desired. The air gap will include a distribution tank, with a positive air gap at the top, to supply wash water to the screens.

HYDRAULIC ANALYSIS

Figure 2 in Appendix A depicts the WWTP's hydraulic profile.

FINANCING METHODS

In addition to traditional local and private funding sources, a variety of funding alternatives sources exist, including through the Idaho Department of Environmental Quality (DEQ), the Department of Commerce and Community Development Block Grants (CDBG), the United States Department of Agricultural-Rural Development (USDA-RD), and the Idaho Bond Bank. It is anticipated that the City will fund this project with wastewater capital reserves.

DESIGN CRITERIA

WASTEWATER FLOWRATES

The following wastewater flow projections were established in the FPS based on data generated from October 2014 to September 2017. The new influent screen will be sized for the 2040 flows, assuming the other influent fine screen is out of service.

TABLE 1: INFLUENT FLOW PLANNING CRITERIA

| Parameter | Current Planning Criteria Flow (MGD) | Current Planning Criteria Unit Flow (gpcd) | Planning Criteria Projected Flow (MGD) | | | | D) |
|------------|--|--|--|-------|-------|-------|--------|
| Year | | - | 2020 | 2025 | 2030 | 2035 | 5 2040 |
| Population | 6,689 | 6,689 | 7,168 | 7,721 | 8,318 | 8,961 | 9,654 |
| AADF | 1.89 | 282 | 2.02 | 2.18 | 2.35 | 2.53 | 2.73 |
| ALF | 1.43 | 214 | 1.54 | 1.66 | 1.78 | 1.92 | 2.07 |
| AHF | 2.52 | 377 | 2.71 | 2.91 | 3.13 | 3.38 | 3.64 |
| MMF | 3.39 | 507 | 3.64 | 3.92 | 4.22 | 4.55 | 4.90 |
| MWkF | 3.66 | 547 | 3.92 | 4.22 | 4.55 | 4.90 | 5.28 |
| PDF | 4.15 | 620 | 4.45 | 4.79 | 5.16 | 5.56 | 5.99 |
| PHF ote: | 4.44 | 664 | 4.76 | 5.13 | 5.52 | 5.95 | 6.41 |

Data from select months in 2017-2019 indicate that the WWTP may experience lower peak flows than expected. In previous years, the WWTP treated over 4 mgd during the peak month. During 2018 and 2019, in comparison, the maximum month flows remained less than 2.6 mgd. This may be attributed to a reduction in infiltration and inflow. The attenuated peaks also drive down average flow values.

Table 2, below, summarizes recent data. As noted, the WWTP typically experiences its highest flows during the summer, as a result of high infiltration and inflow associated with irrigation.

TABLE 2: 2017-2019 PLANT FLOW DATA

| | MGD | | | | | |
|------|----------------|----------------|----------------|--|--|--|
| | 2017 (JanJune) | 2018 (JanOct.) | 2019 (JanJuly) | | | |
| AADF | 1.71 | 1.75 | 1.60 | | | |
| MMF | 2.46 | 2.49 | 2.52 | | | |
| PDF | 2.51 | 2.64 | 3.02 | | | |
| PHF | 2.69 | 2.82 | 3.24 | | | |

Nevertheless, the screen upgrades will still be sized to accommodate the 2040 projected peak hour flow, 6.41 mgd. A larger capacity screen should not compromise the treatment accomplished and represents a conservative approach, prudent in the Headworks equipment, since it experiences peak flows from the collection system.

^{1.} MGD - million gallons per day, gpcd - gallons per capita per day, AADF - Average Annual Daily Flow, ALF - Average Low Flow, AHF -Average High Flow, MMF - Maximum Month Flow, MWkF - Maximum Week Flow, PDF - Peak Day Flow, PHF - Peak Hour Flow.

EFFLUENT REQUIREMENTS

The WWTP discharges to the Payette River. The WWTP operates under National Pollution Discharge Elimination System (NPDES) Permit No. ID-002031-1. Table 3 summarizes permit requirements.

TABLE 3: NPDES PERMIT LIMITS

| Parameter | Average Monthly | Average Weekly | Daily Maximum | |
|---|--|----------------------------|-------------------------|--|
| Biochemical Oxygen Demand (BOD5) October 1 - April 30 | 30 mg/L 1426 lb/day 65% removal | 45 mg/L 2139 lb/day | - | |
| Biochemical Oxygen Demand (BOD5) May 1 - September 30 | 30 mg/L 713 lb/day | 45 mg/L 1070 lb/day | | |
| Total Suspended Solids | 70 mg/L 385 lb/day | 105 mg/L 580 lb/day | | |
| Ammonia (as N) | 1.6 mg/L 74 lb/day | | 4.3 mg/L 205 lb/day | |
| Total Residual Chlorine | 58 μg/L 2.8 lb/day | | 146 μg/L 7.0 lb/day | |
| Fecal Coliform Bacteria May 1 - September 30 | 50/100 ml | 200/100 ml ¹ | | |
| Fecal Coliform Bacteria October 1 - April 30 | | 200/100 ml ¹ | | |
| E. coli Bacteria | 126/100 mL ² | | 406/100 mL ³ | |
| pH lote: | Minimum and maximum between 6.5 and 9.54 | | | |

Note:

The permit, effective December 31, 2001, expired on January 2, 2007 but has been administratively continued.

SOLIDS PRODUCTION, DISPOSAL, AND RECYCLING REQUIREMENTS

Screenings from the existing units are conveyed to a dumpster. The disposal method for the solids will not change as part of this project; screenings collected on the new fine screen will also be transported to the dumpster. This project is not anticipated to impact solids production or disposal.

PROCESS UNITS DESIGN CRITERIA AND SELECTION

The selected screen must pass the 2040 peak hour flow, 6.41 mgd. The Process Units section of this report provides a more complete discussion of requirements and alternatives. The air gap system will also be sized to deliver wash water at the frequency demanded by the influent fine screens.

MASS BALANCE CALCULATIONS FOR PROCESS UNITS

This project will not impact the overall WWTP mass balance.

^{1.} The average weekly fecal coliform count must not exceed a geometric mean of 200/100 ml based on a minimum of five (5) samples per week,

^{2.} A geometric mean of 126 organisms per 100 ml must be based on a minimum of 5 samples taken every 3 to 5 days over a thirty-day period.

^{3.} This is an instantaneous maximum.

^{4.} pH is monitored via grab samples five (5) times per week on separate days.

MONITORING AND REPORTING REQUIREMENTS

Monitoring and reporting requirements are not expected to change as a result of this project.

SITE EVALUATION AND LAYOUT

CURRENTLY PROPOSED FACILITIES

The project upgrades will include a new automatic fine screen to replace the existing coarse screen, a new air gap system, and all supporting equipment.

20-YEAR DESIGN FACILITIES

The new fine screen will have the capacity for the 2040 flow projections, in addition to providing redundancy.

The appurtenant air gap system for the screen's wash water will provide adequate water for the screens. Instantaneous screen wash water pressure and flow requirements are independent of flowrate through the screen. However, as flows increase, the screens will remove more solid material and reach their limiting pressure differential more rapidly, thus requiring wash water more frequently. As such, the associated pumps will be sized and timed to meet 20-year flow rate, pressure, and frequency requirements.

FACILITIES FOR BUILD-OUT CONDITIONS

As previously mentioned, this upgrade will replace the existing coarse screen with a fine screen capable of passing 20-year flows. Accommodating build-out flows will require additional modifications to WWTP equipment and facilities.

SPACE FOR HIGHER LEVELS OF TREATMENT

The screen upgrade only replaces a current process and will neither increase nor reduce open facility space. However, the screen installation is predicted to improve treatment by removing additional solids, and thus, achieve a higher level of treatment, as well as provide redundancy.

The air gap system will reduce open facility space; however, this is a required process to protect the water source from potential contamination. Additionally, the WWTP is currently configured with only the screens located in the headworks buildings. Other processes required to achieve higher levels of treatment would likely be located elsewhere at the WWTP.

LIQUID PROCESS FACILITIES AND CONVEYANCE

This project will not alter the WWTP's liquid process system or conveyance. Figure 3 in Appendix A depicts the overall process flow diagram.

SOLID PROCESS FACILITIES AND CONVEYANCE

Solids removed from the screening processes are conveyed to a garbage dumpster and are transported by truck to a landfill.

PLANT ACCESS AND ON-SITE ROADS AND WALKWAYS

Improvements are contained within the existing headworks building. As such, this project will not impact or necessitate modification to WWTP accesses, roads, or walkways.

PROCESS PIPING AND UTILITIES

New water pipelines will connect the air gap system to the domestic water. The air gap will supply the new screen wash water via a single 1.5-inch diameter line.

The existing piping and channel system leading to and away from the screens will not be altered.

BUFFER ZONES

Since the upgrade will occur within the existing headworks, the WWTP buffer will not be affected.

<u>LANDSCAPING</u>

This project is confined to a single, existing structure and will not disturb existing landscaping, nor will it necessitate additional landscaping.

ADMINISTRATION AND OPERATIONS BUILDINGS

The Administration Building, just east of the chlorine contact chamber, will not be modified or impacted as part of this project.

LABORATORY

The Laboratory is located on the north side of the WWTP, to the east of the Administration Building. This project will not modify or affect the laboratory facilities.

TREATMENT DURING CONSTRUCTION

The existing fine screen will remain operational during construction and will continue to screen influent wastewater flows from the influent lift station. Septage normally passes through the coarse screen before discharging to the lagoons for treatment and evaporation. During construction, the City will likely choose not to accept septage at the headworks. However, if septage is received, the City could either set up a temporary bar screening box, or direct septage directly into the lagoons.

ODOR MANAGEMENT

The screens are located inside the headworks building to reduce odor.

ELECTRICAL REQUIREMENTS

The existing coarse screen operates continuously, and its 3-horsepower motor draws 3 phase power and 230/460 volts. The new screen's 2-horsepower motor relies on a 480 volt, 3-phase supply. It will also include a variable frequency drive. As the replacement fine screen has a similar power requirement to the coarse screen, this project should not include electrical upgrades. The electrical system also has adequate capacity to accommodate the air gap system without service upgrades.

INSTRUMENTATION AND CONTROL SYSTEM

System Configuration

New equipment and instrumentation will be integrated into the existing Supervisory Control and Data Acquisition (SCADA) system for monitoring, reporting, and control. A Programmable Logic Controller (PLC) will be supplied with the new screen, which will provide for communication with the existing SCADA system.

Operator Interface

The new fine screen control panel, with operator interface, will be located in the Electrical Building, just to the southeast of the headworks building. The control panel will include digital inputs, outputs, and an alarm system.

Process Control

The controls are programmed to start-up the screen washing system. The variable frequency drive and local control panel will be installed in the Electrical Building. Equipment can be operated manually by the Operator, if desired. Appendix A contains a Process and Instrumentation Diagram (Figure 4).

HYDRAULIC PROFILE

This project will not impact overall WWTP hydraulics. The hydraulic profile will need to be reevaluated in the future to accommodate provisions for higher levels of treatment and to meet flow requirements beyond 2040.

PROCESS UNITS

CURRENT PROJECT AND 20-YEAR DESIGN AND BUILD-OUT CONDITIONS

As previously established, both the screen replacement and the air gap system will be sized to accommodate both current and 20-year design flows. However, system capacity and requirements will need to be reassessed prior to build-out.

SIZE AND REDUNDANCY

One of the main purposes of the new screen installation is to provide system redundancy. Each fine screen, both the new and existing, will be able to independently pass peak hour flows, if one screen goes off-line as a result of breakdown or for maintenance. The new screen will need to be capable of passing the 2040 peak hour flow of 6.41 mgd.

The air gap system will supply screen wash water only, as the screening system is the only process in the headworks building drawing potable water, which does not currently meet Idaho State Plumbing Code requirements.

PERFORMANCE REQUIREMENTS

The influent fine screen was selected based on the following requirements:

- Pass 20-year peak hour flow, 6.41 mgd
- Have maximum ¼-inch (6-mm) bar spacing
- Fit within existing channel
- Require limited maintenance

The air gap system will be chosen to:

- Provide a positive air gap of greater than two times the diameter of the supply inlet
- Capable of delivering wash water to one or both screens at a time

Alternatives Considered

Only rotary drum fine screens and step screens were considered. These screen types effectively remove debris of the desired characteristics, are energy-efficient, and well-proven.

Steps screens consist of parallel bars which move screenings upward to a removal chute. They travel in a circular path in and out of the channel. These screens accommodate high hydraulic capacities, due to the large surface area, and require little maintenance. They also capture screenings at a greater rate than rotary drum screens.

Rotary drum fine screens offer a low maintenance, rugged option. They cause minimal head loss, accept high screening loads, and fit well within the existing channel. However, they provide a lower screening capture rate than step screens.

The City selected the rotary drum fine screen for this installation, as it will provide adequate treatment, minimally impacts hydraulics, and fits well within the existing channel.

STRUCTURE, EQUIPMENT, AND PIPING LAYOUT

Refer to Figure 5 of Appendix A, which depicts the proposed equipment layout in the Headworks building. The project is not anticipated to impact existing structures or channels.

COLD TEMPERATURE OPERATIONS

Both the screen and air gap system will be contained within the existing headworks building and should thus receive adequate frost protection. There have been no issues with freezing for the existing screens.

PROCEDURES FOR START-UP

Initial start-up will include coordination of new equipment and evaluation of the performance of the equipment. Start-up will require the combined effort of the equipment vendors, installation contractors, Keller Associates, and the City of Emmett.

CODE PROVISIONS

The following codes and standards will be employed in the design of the WWTP influent screen upgrade:

- International Building Code (IBC)
- Uniform Plumbing Code
- Idaho State Plumbing Code
- ASTM Material Standards
- International Mechanical Code (IMC)
- Standard for Protection in Wastewater Treatment and Collection Facilities (NFPA 820)
- National Electric Code (NFPA 70)
- AISC Manual of Steel Construction
- IDAPA 58.01.16 Wastewater Rules
- Hydraulic Institute Standards

- American Water Works Association (AWWA)
- Institute of Electrical and Electronics Engineers (IEEE)
- National Electrical Manufacturer's Association (NEMA)
- Underwriter's Laboratories (UL)
- National Fire Protection Association (NFPA)
- American Society of Mechanical Engineers (ASME)

COST ESTIMATE

The screen replacement and new air gap system are predicted to cost \$781,000. This includes 10% for "General Conditions", which includes mobilization, bonding, and insurance, 20% for "Contingency and Allowances", 15% for "Contractor Overhead and Profit", and 20% for "Soft Costs", which includes engineering and construction management.

TABLE 4: INFLUENT SCREEN PROJECT COST ESTIMATE

| Description | | E | stimated Cost |
|--------------------------------|--------|----|---------------|
| | | | |
| Screen | | \$ | 180,000 |
| Screen Installation | | \$ | 72,000 |
| Air Gap | | \$ | 65,000 |
| Air Gap Installation | | \$ | 26,000 |
| Electrical | | \$ | 51,450 |
| SCADA Integration | | \$ | 34,300 |
| Total Direct | Cost | \$ | 429,000 |
| General Conditions | 10% | \$ | 43,000 |
| Sub | ototal | \$ | 472,000 |
| Contingency and Allowances | 20% | \$ | 94,000 |
| Sub | ototal | \$ | 566,000 |
| Contractor Overhead and Profit | 15% | \$ | 85,000 |
| Total Estimated Construction | Cost | \$ | 651,000 |
| Soft Costs | 20% | \$ | 130,000 |
| TOTAL ESTIMATED PROJECT O | COST | \$ | 781,000 |

The cost estimate herein is based on our perception of current conditions at the project location. This estimate reflects our professional opinion of accurate costs at this time and is subject to change as the project design matures. Keller Associates has no control over variances in the cost of labor, materials, equipment, services provided by others, contractor's methods of determining prices, competitive bidding or market conditions, practices or bidding strategies. Keller Associates cannot and does not warrant or guarantee that proposals, bids or actual construction costs will not vary from the costs presented herein.

PROJECT IMPLEMENTATION AND SCHEDULE

Project implementation and scheduling will be developed with the following considerations:

- Project funding;
- Coordination with other City of Emmett projects:
- Equipment procurement methods;
- Identifying construction constraints; and
- Preparing contract documents

Construction is expected to begin Spring 2020 and last until Summer 2020. During construction, the contractor will be required to:

- Provide and follow an approved construction sequencing plan;
- Isolate the new fine screen channel from wastewater flows through the operation of slide gates, allowing all flow to pass through existing fine screen;
- Salvage coarse screen and deliver to Owner;
- Minimize interruption to other WWTP processes or activities;
- Provide temporary power, when necessary, to prevent any outages.

ENVIRONMENT REVIEW

Improvements will take place within the existing headwork building. Construction is not expected to have new environmental impacts.

STANDARD TERMS AND CONDITIONS

- CONTRACT This document constitutes the full and complete Agreement between the parties and supersedes all prior
 negotiations, representations or agreements, whether written or oral. The Agreement may be amended only if both
 parties specifically agree in writing to such amendment of the Agreement.
- 2. **INVOICES AND PAYMENT** Owner will make payment within 30 calendar days of the invoice date. Consultant shall keep accurate records of expenses. If Owner contests an invoice, Owner shall advise the Consultant within 15 days of receipt of invoice of the specific basis for doing so, may withhold only that portion so contested, and shall pay the undisputed portion.
 - Interest. If payment is not received by the Consultant within 30 calendar days of the invoice date, Owner shall pay interest at a rate of 1½% per month (or the maximum allowable by law, whichever is lower) of the past due amount. Payments will be credited first to interest and then to principal.
 - **Suspension.** If the Owner fails to make payments when due, the Consultant may suspend performance of services upon five (5) calendar days' notice to the Owner. Owner agrees to indemnify and hold Consultant harmless from any claim or liability resulting from such suspension.
- 3. DOCUMENTS All documents prepared or furnished by Consultant are instruments of service, and Consultant retains ownership and property interest (including the copyright and the right of reuse) in such documents. Owner shall have a limited license to use the documents in and for the Project subject to full payment for all services relating to preparation of the documents. The Owner agrees to obtain prior written agreement for any reuse or modifications of the instruments of service, and understands that any unauthorized use of the instruments of service shall be at the Owner's sole risk and without liability to the Consultant.
- 4. STANDARD OF CARE The standard of care for all professional engineering and related services performed or furnished by the Consultant under this Agreement will be the care and skill ordinarily used by members of the subject profession practicing under similar circumstances at the same time and in the same locality. The Consultant makes no warranties, expressed or implied, under this Agreement or otherwise, in connection with the Consultant's services. Consultant shall exercise usual and customary professional care in its efforts to comply with applicable codes, regulations, laws, rules, ordinances, and such other requirements in effect as of the date of execution of this Agreement.
- 5. CHANGES OR DELAYS The proposed scope of services, compensation, schedule, and allocation of risks reflect Consultant's understanding of the Project at the date of this Agreement. Costs and schedule commitments shall be subject to renegotiation for changed conditions, unreasonable delays caused by the Owner's failure, independent government agencies, acts of God, or causes beyond the reasonable control of Consultant. Where this occurs, changes in the Agreement shall be negotiated and an equitable adjustment shall be made.
- 6. **TERMINATION** The Owner and Consultant may terminate this Agreement in whole or in part at any time by giving 30 days written notice thereof. The Owner shall promptly pay Consultant for all services rendered to the effective date of suspension of services, plus suspension charges, which shall include the cost of assembling documents, personnel and equipment, rescheduling or reassignment, and commitments made to others on the Owner's behalf.
- 7. SUSPENSION OF SERVICES If the Owner suspends services of the Consultant for any reason for more than thirty days, the Consultant shall be reimbursed for expenses incurred due to suspension of services, including costs associated with rescheduling or reassigning personnel, and commitments made to others on Owner's behalf.
- 8. **INDEMNITY AND LIMITATION OF LIABILITY** Owner and Consultant each agree to indemnify and hold the other (including their respective officers, directors, employees, agents, owners, shareholders, members, partners, sub-consultants, subcontractors, and representatives) harmless from and against liability for all claims, losses, damages and expenses, to the extent such claims, losses, damages, or expenses are caused by the indemnifying party's negligent acts, errors or omissions. In the event claims, losses, damages, or expenses are caused by the joint or concurrent negligence of Owner and Consultant, they shall be borne by each party in proportion to its negligence. Neither the Owner nor Consultant shall be liable for incidental, indirect or consequential damages. The Consultant's liability to the Owner and to all construction contractors and subcontractors on the Project, due to the Consultant's negligent acts, errors omissions, or breach of contractual obligations relating to or arising out of the Project shall not exceed twice the Consultant's total fee.

- 9. **OPINIONS OF COST** Consultant's opinions of probable cost represent Consultant's judgment as an experienced and qualified design professional. Since Consultant has no control over the cost of labor, materials, equipment, or services furnished by others, or over the Owner's and other contractor's methods of determining prices, or over competitive bidding or market conditions, the Consultant cannot and does not guarantee that proposals, bids, or actual construction cost will not vary from opinions of probable cost prepared by the Consultant.
- 10. CONSTRUCTION PHASE SERVICES If Consultant performs any services during the construction phase of the Project, Consultant shall not supervise, direct, or have control over Contractor's work. Consultant shall not have authority over or responsibility for the construction means, methods, techniques, sequences or procedures or for safety precautions and programs in connection with the work of the Contractor. Consultant does not guarantee the performance of the construction contract by the Contractor and does not assume responsibility for the Contractor's failure to furnish and perform its work in accordance with the Contract Documents.

11. MISCELLANEOUS

Right of Entry: Unless otherwise noted in the scope of work, the Owner shall provide for Consultant's right to enter the property owned by the Owner and others in order to fulfill the services to be performed hereunder.

Dispute Resolution: Owner or its Contractor agree to notify Consultant of any claims against the Consultant within 10 days of discovery of any allegations, errors or omissions. Should a dispute arise, Owner and Consultant agree to negotiate disputes between them in good faith for a period of 30 calendar days from the date the dispute is raised in writing by either the Owner or Consultant. If the parties fail to resolve the dispute through negotiation, then the dispute shall be decided through non-binding mediation or other mutually agreed alternative dispute resolution technique. Fees and expenses for mediation shall be split equally between the parties. The Owner and Consultant agree non-binding mediation or other mutually acceptable dispute resolution technique shall precede litigation. This Agreement shall be governed by the laws of the State where the Project is located.

Hazardous Environmental Conditions: The scope of Consultant's services does not include any responsibility for detection, remediation, accidental release, or services relating to waste, oil, asbestos, lead or other hazardous materials, as defined by Federal, State, and local laws or regulations. Consultant is not required to be become an arranger, operator, generator, or transporter of hazardous substances, and shall have no responsibility for the discovery, handling, removal, disposal or exposure of persons to hazardous substances of any form.

Consultant Reliance: Consultant shall be entitled to rely, without liability or the need for independent verification, on the accuracy and completeness of any and all information provided by Owner, Owner's consultants and contractors, information from public records, and information ordinarily or customarily furnished by others, including, but not limited to specialty contractors, manufacturers, suppliers, and publishers of technical standards.

Certifications: Consultant shall not be required to sign any documents that result in Consultant having to certify, warrant, or guarantee the existence of conditions whose existence Consultant cannot ascertain within its services for the Project.

Third Parties: Nothing contained in this Agreement shall create a contractual relationship with, or a cause of action in favor of, a third party against either the Owner or Consultant. Consultant's services hereunder are being performed solely for the benefit of the Owner, and no other entity shall have any claim against Consultant because of this Agreement or Consultant's performance of services hereunder.

Severability & Waiver: In the event any of these Contract Provisions are found to be illegal or otherwise unenforceable, the unenforceable Contract Provisions will be stricken, and those remaining Contract Provisions shall continue in full force and effect. The failure of either party of this Agreement to insist, in any one or more instances, upon the performance of any of the terms, covenants or conditions of this Agreement, shall not be construed as a waiver of such term, covenant or right.

Joint Drafting: The Parties expressly agree that this Agreement was jointly drafted, and that they both had opportunity to negotiate its terms and to obtain the assistance of counsel in reviewing its terms prior to execution. Therefore, this Agreement shall be construed neither against nor in favor of either Party, but shall be construed in a neutral manner.

for

Final Design and Construction Engineering Services for 12th Street Booster Station

between
KELLER ASSOCIATES, INC.
and
CITY OF EMMETT, IDAHO

KA #210022 Scope and Budget

ARTICLE I—Project Description

The City of Emmett desires to construct a new booster station located off 12th Street to provide water supply that meets state public drinking water standards to a new pressure zone. The basis of design, service area, size, and components of the booster station are detailed in the Department of Environmental Quality (DEQ) approved July 2019 Payette River Orchards Water Booster Pump Station (also referred to as the 12th Street Booster Station) Preliminary Engineering Report (PER). A basic summary of the facilities includes a package style 4-pump booster station (two 170 gpm duty pumps and two 1500 gpm fire pumps), pressure tank(s), generator, and electrical gear housed inside a pre-engineered CMU building. It is understood by all parties that the Consultant can rely upon and use the information and data presented in the approved PER, including geotechnical information, for completing final design services. If revisions to PER are desired or needed to complete final design services, they can be provided by Consultant as an additional service.

Topographic survey data for the project area in CAD format will be made available to the Consultant by the Owner which data can be relied upon. It is further understood that the booster station will be located at the southeast corner of the intersection of Royalty Avenue and E 12th Street within 100 feet of an existing 12-inch water main on a site that will be either donated or a permanent easement provided to the City by a local developer. The Consultant will not provide any support for site acquisition or easement support. Site improvements are only anticipated to include access off 12th Street, infiltration swales for stormwater disposal, combination of asphalt/concrete/gravel driveways, and security lighting and fencing.

ARTICLE II—Scope of Work

The following engineering services shall be provided by Keller Associates (Consultant) as part of this Agreement for Engineering Services.

A. Project Management

Project management includes general project administration services including contract administration, monthly invoicing, regular progress reports, maintaining project schedule, and internal project administration. Deliverables include regular progress reports and invoices.

Kickoff meeting: Schedule a project kick-off meeting to discuss key design concepts, project goals and objectives, and project constraints.

Deliverables: Regular progress reports, invoices, and progress meeting agendas and minutes

B. Permitting

No environmental or local, state, or federal regulatory permitting support will be provided by the Consultant. The City will provide the Contractor a building permit using the final design plans provided by the Consultant. The Contractor will be responsible for all building permit fees unless waived by the City.

C. Final Design

Final design of the project components as outlined in Article I—Project Description will be completed by the Consultant. Consultant will prepare site civil, grading and drainage, mechanical, structural, architectural, plumbing and HVAC, electrical and control (P&ID) drawings and technical specifications for the project improvements with the understanding that construction will be performed by a single general contractor. Construction (ISWPC) and Keller Associates standard specifications. The following provisions will govern the final design services:

- 1. **Design Drafting:** Consultant will perform design drafting in AutoCAD for the drawings. Drafting will be completed on 11"x17" sheets.
- 2. Bidding and Technical Specifications: Technical specifications will be developed with the understanding that front-end construction bidding documents (bid advertising, instructions to bidders, bid forms, bid bonds, insurance requirements, agreements, general provisions, and supplemental conditions) shall be based on 2013 edition of the EJCDC. It is assumed that no equipment pre-purchase or pre-selection will be accomplished.
- 60% Drawings: Consultant to prepare 60% drawing set for Owner review and comment and meet with Owner to receive comments and discuss drawings for comment resolution.
- 4. 95% Drawings and Specifications: Consultant will take the 60% design review comments and incorporate into the 95% set of design drawings. Consultant will provide the Owner a set of 95% drawings and specifications for Owner and DEQ review and comment. Consultant will prepare an updated opinion of probable cost for the project. Project erosion and sediment control plans will be required from the Contractor. It is understood that the City's SCADA integrator will provide SCADA programming and integration as a subcontractor for the prime contractor. As such, the City's SCADA integrator will provide a courtesy review of the 95% design drawings and specifications and complete the SCADA panel design. The Consultant will meet with the Owner to receive comments and discuss 95% drawings and specifications.

- 5. **100% Drawings and Specifications:** Consultant will incorporate appropriate revisions made by the Owner and other permitting agencies into a final set of stamped drawings and specifications.
- 6. **Deliverables:** Consultant will provide the following deliverables as part of completion of this task:
 - 60% Drawing package (3 hard copies 11x17; electronic copy in PDF format).
 - 95% Drawings and specifications (3 hard copies 11x17; electronic copy in PDF format).
 - 100% Drawings and specifications (2 hard copies 11x17; electronic copy in PDF format).
 - Updated opinion of probable cost estimates at 95%.

D. Bidding Support

Consultant will provide bidding support for a single, public advertisement bid process with an award to a single general contractor. Bidding support will include attendance to a prebid meeting, responding to contractor questions during the bidding process, issuing addenda, attending the bid opening, reviewing bids, and recommending an action in response to the submitted bids.

E. Construction Engineering (Future Task) – To be determined at a future time.

ARTICLE III—Compensation

Summary of Professional Services Fees

| Task | Description | Billing | Budget/Fee |
|------|--------------------------|---------|------------|
| _A | Project Management | LS | \$6,100 |
| В | Permitting | T&M | _ |
| С | Final Design | LS | 61,400 |
| D | Bidding Support | LS | 6,800 |
| E | Construction Engineering | LS/T&M | TBD |
| | Subtotal | | \$74,300 |

ARTICLE IV—Time Schedules: Once Consultant has received authorization to proceed through a signed contract, Consultant shall promptly proceed with the work outlined in Article II. It is contemplated that Consultant will submit 95% plans to DEQ and Owner within 4 months of receiving a signed contract to proceed.

ARTICLE V—Services Not Included in Scope of Work or Provided by Others

The following services/items are not included in this scope of work and budget and will either be provided by others or can be provided by Consultant upon a mutually agreed upon contract addendum.

- 1. Utility locates.
- 2. Access to records and mapping.
- 3. Publication and advertisement costs.
- 4. Topographic and boundary surveying.
- 5. Geotechnical exploration, testing, and analysis. Additional potholing, if desired.
- 6. Funding support since it is understood City reserves will fund the project improvements.
- 7. Legal fees, legal review of contract and bid documents.
- 8. Environmental surveys, reports, and/or field investigations.
- 9. Recording fees.
- 10. Land and easement negotiation and purchase costs.
- 11. Landscape design.
- 12. Support or attendance to public meetings and open houses
- 13. Design of offsite dry and wet utility extensions (accepting less than 100 feet of 12-inch suction water main)

City's Strategic Pillars 10/22/19

- Economically Vibrant and...
- Health-conscious city
- Legally compliant with all state and federal laws
- Performing its constitutional mission (protecting people and property)
- With adequate infrastructure for growth

Building/Zoning Department Goal

- Educate staff to obtain intimate knowledge of building and zoning codes. 20%
- Update outdated city ordinances, <u>implement new ordinance</u>——80% zoning and building only.
- Obtain accessibility inspector certification for ADA compliance----40%
- Create ADA transition plan to evaluate all City owned buildings and property. 95%
- Certified Floodplain Manager 75%

Expenditures requiring authorization from higher and purpose of expenditure

None

Current Projects

- 1. Start reviewing lot sizes for R-2, duplex zone. Would like to reduce the minimum lot size from 8000 down to? Had first and second meeting on this, zoning commission is on board to reduce lot size down to 6000 sq. ft. for a R-2 zone. Will bring back a formal amendment.
- 2. Start on proposal to adjust/reduce boundaries of the Historic Central Business District for design review.
- 3. Drafting ordinance to allow placement of tiny homes. This amendment has been approved by the State of Idaho Building Code Board and will go into the Legislature in January 2018.
- 4. Re-writing Area of Impact Agreement between City of Emmett and Gem County.
- 5. Started a draft Oil and Gas Ordinance. Draft is done. Working on revisions
- 6. Ordinance revision to allow Manufactured Homes in an R-1 zone without a variance. Draft is done.
- 7. Revisions to rubbish ordinance.
- 8. Working with County to finalize Area of Impact Map boundary.
- 9. <u>Permits, September 2019: New house = 3. Commercial =, Duplex = , Apartment = Hangars = 0, Manufactured Home = Fees Collected: \$ 7018.40</u>
- 10. Airport Planning for the future.
- 11. Reviewing Draft Sewer and Water Late-comers Policy
- 12. Zoning Applications:
- Preliminary plat, Payette River Orchard 243 Lots--Continued to Nov. 4, 2019
- Special Use Permit, 210 Main Street LLC, Church in residential zone--Continued to Nov. 4, 2019
- Development Agreement, 210 Main Street LLC—Continued to Nov. 4, 2019
- Variance 210 Main St. LLC, Lot Size--Continued to Nov. 4, 2019

Plan for next 30 days

- 13. Convert our building permit software over to Black Mountain: Partially complete
- 14. Continue with Building, ADA, and Floodplain webinars
- 15. Review Economic Development chapter of comp. plan Complete
- 16. Review Community Design chapter of comp. plan
- 17. Review Education Chapter of comp. plan -Complete
- 18. Design Review for a two-story office building- Sawtooth Land Surveying
- 19. Administrative Lot Split review- S. Boise Ave. Stephen Frey

Training

(see attached)

This report does NOT contain any data required by ordinance or statute...that is covered in a separate report

Building and Zoning

City's Strategic Pillars

10/16/19

- Economically Vibrant and...
- Health-conscious city
- Legally compliant with all state and federal laws
- Performing its constitutional mission (protecting people and property)
- With adequate infrastructure for growth

Clerk's Goals this Budget Year

- Employee Health Insurance Renewal- Costs/Coverage
- Establish an Asset Management Plan for each Department
- Set up electronic files for permanent documents (resolutions, ordinances, ect.)
- Increase ACH (Direct Pay) 10%
- Comply with Code on Retention of Records Management
- Fully Cross Train Utility Clerk/Deputy Clerk on operational processes

Expenditures requiring authorization / purpose of expenditure

None

Training

Deputy Clerk to attend PRIMA October 16, 2019

Accomplishments since last report

- IIIA Enrollment completed for October 1, 2019
- 2019-2020 Budget Published and ready for activation October 1, 2019
- Increased ACH (Direct Pay) by 92 customers from September 2018 to September 2019
- Completed September Financials and Bank Reconciliation
- Signed Contract with Access Idaho Now accepting Credit/Debit card payments on all fees ie.
 Business license, dog license, permit fees, cemetery fees ect.
- Updated renewal rates to employee records for IIIA Insurance
- Updated employee files and payroll system to reflect 3% COLA and Merit Increases

Plan for next 30 days

- Training with Black Mountain and Building Department on Permitting Module
- Promote ACH (Direct Pay) and increase client participation by 10 clients each month
- Cross Train Deputy Clerk on Payroll Process- currently ¾ complete on process
- Cross Train Deputy Clerk on City Financial Statements 0 completion on process
- Train Deputy Clerk on License Renewal Process, Alcohol, Bartenders, Business ect.
- Request Financials from Candidates to comply with the Sunshine Law requirements, next report due October 29, 2019
- Process end of fiscal year entries and reports
- Schedule Annual Audit with Zwygart and Associates
- Integra Paperless Business Solutions to scan all our Minute Books into digital record and to return the original records by October 30, 2019
- Research Temp Employment Agency Cost for leave of absence of an employee March-May

City's Strategic Pillars

- Economically Vibrant and...
- Health-conscious city
- Legally compliant with all state and federal laws
- Performing its constitutional mission (protecting people and property)
- With adequate infrastructure for growth

Police Department Goals this Budget Year (with percentage of completion to date)

- Retain 100% of Patrol Officers and Patrol Sgts. for no less than 3 years. (37% of Completion)
- Proactively make residences and businesses along 1/5 of the main arterials in the city at least 80% ordinance compliant each year, in addition to reacting to citizen complaints; new arterials will be targeted each year. (% of completion)
- Reduce domestic violence repeat offenses by 50%. (Current 8 / 2018 at this time 12 / 33% decrease)
- Ensure 100% of police department staff attends C.I.T. Training to improve mental hold process by end of 2019 fiscal year. (92% of completion)
- Form, train and deploy a Narcotic Detection Team that includes a drug detection canine. (100% of completion)

Expenditures requiring authorization from higher and purpose of expenditure

- Purchase of parts for short barrel rifle conversion Approx. \$1,300.00.
- Purchased approx. \$2000.00 worth of uniforms for 7 officers.

Training Last 30 days

See attached

- No less than Top Ten Accomplishments since last report.
- Drone pilot will start training during the month of October.
- Officer Roehr has begun F.T.O. with the department and is going to become P.O.S.T. Certified.
- Sgt. Bertalotto will be handling Code Enforcement while Roehr is training.
- One Officer attending P.O.S.T.
- D.C. Babcock is updating the lexipol policy pertaining to department rewards like a Life Saver Award.
- Sgt. Bertalotto will be comparing dispatch agreements with others and present to council in October.
- 8 officers from our department attended domestic violence training put on by ROSE Advocates.
- Have finally made second contact with Lara, from CARES, who advised she is still teaching No, Go, Tell classes.
 Have contacted Mrs. Smith at Carberry and Shadow Butte who is arranging these presentations.
- Kiwanis is interested in creating a fund raiser involving flat chief. Moving Flat Chief to second business.
- Created a rough draft of a protocol of how to call out K9 team which will be followed by EPD and GCSO.
- Met with Principals of all the schools and Superintendent to discuss protocol of when to call dispatch. Also revisited the S.R.O. responsibilities.
- Was contacted by Buck Nash who wants to provide a reflective product for students to wear while walking to school or while waiting at a bus stop.
- Waiting on architect to break up remodel plans into phases and also give an estimate of cost.
- Have purchased enough parts to convert 3 rifles over to short barrel with suppressors. Must be registered with ATF.

Plan for next 30 days

- Will be purchasing signs from Squaw Butte Signs that authorize GCAT to tow vehicles that are not authorized to park in the city hall parking lot during Cherry Festival. (next year)
- Have reviewed updated tow policy in Lexipol and need to review State Police Policy.
- Continue teaching at schools.
- Provide Domestic Violence Community Training in Emmett. Will be contacting Rose Advocates to assist with providing both training to first responders and the community.
- Review PAL Pound contract / revisit the possibility of increasing pound fees. Renew contract.

- Implementation of new lockdown procedure.
- Training of K9 and SRO to complete drug detection team.
- Remodeling of PD
- Put on Stranger Danger Presentations at preschools and Elementary schools.
- Making students who are at bus stops safer.
- Clint and I will be discussing how to get better use of the tin building.
